

EasySplice Instructions

1. Slide the EasySplice into the centre of the rope
2. Place the end of the rope into the end of the EasySplice
3. Remove the EasySplice, which will pull the tail through the rope to form the loop
4. To lock the loop push the EasySplice through side of the rope
5. Place the end of the rope in the EasySplice and pull through to produce the loop
6. With the other end of the rope repeat this process
7. Slide the EasySplice up the middle of the rope as before and pull the tail through the rope to tidy it up
8. Cut the end of the tail away and pull the rope over the top so it is now inside and you have completed the splice
