

Barton DO550 Rope Clutches

Part #s 81500, 81501 & 81502

Designed for cruising and racing yachts up to 10m (34ft) with a holding power of 550kgs (1200lbs).

The clutches are manufactured from impact resistant nylon with anodised marine grade aluminium base plate and cam. Stainless steel fairleads at both ends help prevent wear to the clutch and halyard lines.

The design features a true clutch mechanism which allows adjustment in the closed position whilst release under load is positive and requires little effort.

The bolt together construction allows for ease of servicing and replacement of parts. A full range of components is available from your Barton stockist.

81500 – Single Rope clutch

Length = 133mm (5 ¼"), Width = 38mm (1 ½"), Height = 63mm (2 ½")

Hole centres = 79mm (3 1/8")

81501 – Double Rope clutch

Length = 133mm (5 ¼"), Width = 64mm (2 ½"), Height = 63mm (2 ½")

Hole centres = 79mm (3 1/8")

81502 – Triple Rope clutch

Length = 133mm (5 ¼"), Width = 90mm (3 9/16"), Height = 63mm (2 ½")

Hole centres = 79mm (3 1/8")
