

Custom Recirculating 16mm Ball Bearing Slider Systems

Barton Marine custom designed ball bearing slider systems are used in both Marine and Industrial applications.

Major International Marine brands use Barton Marine pre-loaded roof sliders systems and custom bed & door slider assemblies.

OEM Marine Customers include: Sealine, Bavaria, Infinity Boats, Bella Boats, Corsiva & Broom.

Pre-loading the ball bearing sliders onto exact length track means less production time per boat. All aluminium parts are Spectro 2000 anodised to 25 microns for a long service life.

Slider SWL 130kg (290lbs).

Industrial applications are numerous and include vertical ladder slider systems. Ideal for packing facilities, libraries or high shelving, track lengths up to 5m (16ft) long can be supplied .

UK manufacturing gives Barton greater flexibility to design and produce custom slider sets to customer specifications.
