

Barton 25mm (1") Genoa Cars Pinstop and Towable

Introducing a popular range of Genoa cars designed to run on 25mm (1") 'T' track. All are manufactured from high quality marine grade aluminium and finished with our unique 'Spectro' grey anodised finish for added protection.

Genoa cars and sliders feature moulded nylon inserts to ensure free, smooth running under load and prevent damage to finish or potential corrosion.

#25100 Genoa car with plunger stop:
Features precision turned Ertalyte sheaves running on a large diameter centre bearing, for friction-free performance under load. Sheaves are designed with extra width to accept two sheets. The sheave axle is through-bolted and riveted for extra strength.

#25220 Towable Genoa car:
With a sheave in place of plunger, allowing a control line to be lead aft so that genoa car adjustments can be made from the cockpit. Use in conjunction with #25221 end fitting shown.
