

Barton 32mm (1 ¼") Genoa Cars Pinstop and Towable Standard & Heavy Duty

Introducing a popular range of Genoa cars and sliders designed to run on 32mm (1 1/4") 'T' track. All are manufactured from high quality marine grade aluminium and finished with our unique 'Spectro' grey anodised finish for added protection. Genoa cars feature moulded nylon inserts to ensure free, smooth running under load and prevent damage to finish or potential corrosion. Genoa cars are available in a heavy-duty version (HD) for larger craft or for larger load applications.

#32100 & #32101 (HD) Genoa car with plunger stops

Features precision turned Ertalyte sheaves running on a large diameter centre bearing, for friction-free performance under load. Sheaves are designed with extra width to accept two sheets. The sheave axle is through-bolted and riveted for extra strength.

#32210 & 32211 (HD) Towable genoa cars

With a sheave in place of a plunger, allowing a control line to be lead aft so that genoa car adjustments can be made from the cockpit. Use in conjunction with end fitting #32221
