

ClamSeal™ #60001

The award-winning, patented Clamseal™ - repairs inflatables fast – even when wet.

The Clamseal™ can instantly repair splits and tears up to 90mm (3 ½") in length without the use of any hand tools or adhesive.

Clamseal™ is a patented glue-less repair system that instantly repairs small tears or splits in inflatables above or below the waterline – regardless of the fact that the material may be wet.

The system works by using two half 'shells' that screw together tightly, using the inflatable material itself as a water and airtight seal. It is quick and easy to fit and provides an immediate repair which can be left on permanently or keep you afloat until a different repair can be made.

The Clamseal™ is now a permanent item in safety kits on Ribs and Lifeboats around the world.

- Quick and easy to fit
- Requires no adhesive, glue or tape
- Can be used above or below the waterline
- Can be used on wet materials
- Provides an instant water and air tight repair
- Re-usable again and again
- A low cost solution to an otherwise complicated problem

Clamseal™ is suitable for use on

- RIBS
- Dinghies
- Life rafts
- Buoyancy bags
- Virtually any inflatable product

Part Number: 60001

Length = 103mm (4")

Width= 51mm (2")

Weight= 41g (2oz)
