

Dinghy Re-circulating 16mm (5/8") Ball Bearing Traveller System

Complimenting Barton's successful larger traveller range, the dinghy traveller system uses proven recirculating Delrin ball technology and features a drilled 16mm (5/8") wide track.

With a holding power of up to 130kgs (290lbs), the attachment eye allows the system to be easily secured to our Size 0 block range, creating powerful purchase ratios.

Traveller, end fittings and track are manufactured from high quality marine grade aluminium with our unique Spectro grey or black anodised finish for added protection.

Comprehensive sizing and dimensions can be found on our website:
