

## Barton Marine 25mm (1") 'T' Track Sliding Cleat

A cost effective solution to fitting a mid-ship spring cleat where access under the side deck is limited - simply remove a Genoa track end stop, slide on the cleat and lock it in the desired position.

When not in use, slide the cleat to one end of the track, or leave off one track end permanently to enable easy removal of cleat.

Alternatively, fit a short length of track in the desired position so that cleats can be fitted when required and removed when not in use

25mm (1") cleats have an extruded aluminium base with a moulded nylon cleat and screw lock.

Available in two sizes:

#51253 comes with a 165mm (6 ½") nylon cleat

#51254 comes with a 200mm (7 ⅞") nylon cleat
