

Barton Marine 32mm 'T' Track Sliding Cleat

Barton's robust new 32mm stainless steel sliding cleat replaces the cast aluminium version providing a stronger, sleeker design for this popular car.

A cost-effective solution to fitting a mid-ship spring cleat where access under the side deck is limited – simply remove a genoa track end stop, slide on the cleat and lock it in the desired position.

Constructed in 316 marine grade stainless steel.

When not in use, slide the cleat to one end of the track, or leave off one track end permanently to enable easy removal of cleat.

Part Number: 51323

Product Name	Part Number	Cleat Material	Length (mm)	T Track width (mm)	Weight (g)
Sliding cleat	51323	Stainless Steel	152	32	433
