

Towable Genoa Car System

An established favourite with sailors around the globe, Barton 'T' Track Genoa cars are compatible with all types of 'T' Track. The advantage of a line adjustment system is that the crew do not have to leave the safety of the cockpit to obtain perfect trim when reefing the headsail.

We have developed our current design and have incorporated control line sheaves within the body of the sliders and end fittings. The result is a more compact unit with less likelihood of sheet fouling, plus they look great too!

The towable 'T' Track Genoa car system is available in three sizes for yachts from 19ft 6".

We have kept the same part numbers as the existing range of towable Genoa cars and towable end fittings, these are as follows:

Genoa card and towable end fittings:

| | |
|---|-------|
| 25/32" 'T' Track towable Genoa Car | 22220 |
| 25/32" 'T' Track end fitting (single) | 22221 |
| 1" 'T' Track towable Genoa Car | 25220 |
| 1" 'T' Track end fitting (single) | 25221 |
| 1 ¼" 'T' Track towable Genoa Car | 32210 |
| 1 ¼" 'T' Track towable Genoa Car (heavy duty) | 32211 |
| 1 ¼" 'T' Track end fitting (single) | 32221 |
