

Classic Wooden Block Construction Parts and Fastener Tool

Barton is proud of the interior assembly of our 80mm (3 5/32") sheave size, 14mm (9/16") rope diameter Classic Wooden Block. Showing our Torlon needle roller with Delrin ball bearing construction, Barton's design provides low friction, high performance value transcending other wood blocks in its class and will certainly put a smile on the face of every classic boat sailor. Our Barton Classic Fastener Tool allows for easy dismantling for cleaning and re-varnishing of the wooden cheek sides for years of use and enjoyment!
